

LUMAWISE ENDURANCE S ZHAGA BOOK 18/Z10 STREET LIGHT CONNECTORS:

REDUCE THE COMPLEXITY OF
STREET LIGHTING ARCHITECTURE

LUMAWISE ENDURANCE S CONNECTORS HAVE BEEN DESIGNED AS A STANDALONE SYSTEM AND CAN BE USED IN A COMPLEMENTARY FUNCTION AS AN AUXILIARY SENSOR MODULE WHEN ADDITIONAL FUNCTIONALITY IS REQUIRED IN ANSI/NEMA BASED LIGHTING FIXTURES. INSTALLATION IS EASY AND FAST. PUSH-AND-TWIST WITH ONE HAND LOCKING DOES NOT REQUIRE ANY SPECIAL TOOLS.

TE Connectivity (TE)'s LUMAWISE Endurance S Connector System is a complete set of products specially designed for street and area lighting. There are two main offerings. The original Endurance S Zhaga Book 18 connector system enables D4i controlled Zhaga Book 18 compliant luminaires while the Endurance S Keyed Connector System enables non-Book 18 applications like Z10.

LUMAWISE Endurance S includes a receptacle, mounted to a street or area light fixture, as well as several base and domes, that together form a robust enclosure for sensor modules and network lighting control systems. The design is compact, UV resistant, IP66 seal rated and can be mounted on the top, bottom or even the side of a luminaire, offering flexibility to the designer.

Extending from the Endurance S portfolio is the S2 receptacle. Offered in both Zhaga Book 18 and Z10 enabled keyed varieties the S2 receptacle introduces a two-wire per contact solution for ease of wiring and applied cost savings in luminaires with dual node architecture.

BENEFITS

- Compact size allowing greater flexibility in luminaire design
- IP66 sealing with no mounting screws
- Simple insert and rotate to lock feature, no tooling needed and one handed operation to install allows luminaires to be simply and quickly upgraded
- High impact protection - IK09 rating
- Flexible mounting position. Top mounted, side mounted and bottom mounted facing
- Scalable solution allows use of Ø40mm and a Ø80mm controls with the same connection interface
