

## TWIST SPLICE WIRE CONNECTORS

TE Connectivity's (TE) wire connectors answer the need for inexpensive, insulated electrical terminations. They can be used in almost every type of residential and commercial application where multiple wires need to be brought together for a reliable termination. TE wire connectors, which include Wire Grip, Wing Grip, Twist Grip, Ground Grip and Cap Grip connectors, are designed to meet industry standard color-coding specifications and terminate the corresponding range of wire sizes. The screw-on wire connectors contain a live-action square spring which draws wires deep into the spring for a safe, positive "grip" of the wires.
